

REGIONAL TRENDS LEAST DEVELOPED COUNTRIES

HIGHLIGHTS

- FDI in the least developed countries (LDCs) increased by 13 per cent to \$26 billion, despite the acceleration of funds repatriation by oil companies, which resulted in negative inflows to Angola, at -\$4.1 billion (from -\$1.9 billion in 2020).
- Flows remained concentrated, with the top five recipients (Mozambique, Ethiopia, Cambodia, Bangladesh and Senegal, in that order) accounting for 69 per cent of total FDI in the group.
- FDI inflows to the 33 African LDCs increased by 17 per cent to \$16 billion, accounting for almost two thirds of all LDC inflows. Inflows exceeded \$1 billion in five African LDCs. In Mozambique, inflows grew by 68 per cent to \$5.1 billion, and the country saw a jump in greenfield projects. FDI in Senegal rose by 21 per cent to \$2.2 billion. Flows to Zambia remained negative at -\$457 million, due to a \$1.5 billion copper mine divestment.
- In the nine Asian LDCs, FDI inflows rose by 6 per cent to \$9.8 billion, or one third of the LDC total. In Cambodia, the largest LDC recipient, FDI was down by 4 per cent, at \$3.5 billion. Greenfield projects fell to only \$124 million (from \$1.6 billion in 2020), but international project finance deals numbered eight (compared with only two in 2020). In Bangladesh, inflows rose by 13 per cent to \$2.9 billion – about the pre-pandemic level.
- The number and value of greenfield project announcements in LDCs continued their downward trend in 2021. The number of projects fell to the lowest level since 2008. Their value fell to the lowest ever recorded, \$12 billion. This is a major concern as these investment types are crucial for building productive capacity and thus for prospects of sustainable recovery. By value, the largest projects announced were in energy and gas supply and in information and communication.
- International project finance deals targeting LDCs decreased by 6 per cent in number (to 73) but rose by 69 per cent in value. Renewable energy projects accounted for the largest number (34), while power projects accounted for the largest value (\$41 billion).
- Investment in SDG sectors in LDCs remains weak. The number of foreign investment projects (both greenfield and international project finance deals) fell in important SDG sectors, including renewables, power, food and agriculture, and health. They rose in transport, WASH (water, sanitation and hygiene) and education.
- MNEs from developing countries play an increasingly important role in LDCs. China continues to be the largest source of FDI, with its FDI stock in the group reaching \$46 billion – a 38 per cent rise from 2016.
