

# FACTS ON INVESTOR—STATE ARBITRATIONS IN 2021: WITH A SPECIAL FOCUS ON TAX-RELATED ISDS CASES

#### HIGHLIGHTS

- The total count of known investor—State dispute settlement (ISDS) cases reached 1,190 at the end of 2021. At least 68 ISDS cases were initiated under international investment agreements (IIAs) in 2021.
- The new ISDS cases in 2021 were brought against 42 countries. Five countries Cambodia, Congo, Finland, Malta and the Netherlands faced their first known ISDS claims.
- Two IIAs signed in the 1990s the Energy Charter Treaty (ECT, 1994) and the North American Free Trade Agreement (NAFTA, 1992) continued to be the instruments invoked most frequently.
- UNCTAD data suggest that investors have challenged tax-related measures in 165 ISDS cases based on IIAs. High-profile examples include cases related to the imposition of capital gains taxes (*Cairn v. India, Vodafone v. India (I) and (II)*), tax investigations and large tax assessments (*Hulley Enterprises v. Russia, Veteran Petroleum v. Russia, Yukos Universal v. Russia*), and regulatory changes to feed-in tariffs for renewable energy production (*The PV Investors v. Spain, Charanne and Construction Investments v. Spain*).
- This IIA Issue Note expands on research published in UNCTAD's World Investment Report 2022.

Figure 1. Trends in known treaty-based ISDS cases, 1987-2021

Source: UNCTAD, ISDS Navigator.

*Note:* Information has been compiled from public sources, including specialized reporting services. UNCTAD's statistics do not cover investor—State cases that are based exclusively on investment contracts (State contracts) or national investment laws, or cases in which a party has signaled its intention to submit a claim to ISDS but has not commenced the arbitration. Annual and cumulative case numbers are continually adjusted as a result of verification processes and may not match exactly case numbers reported in previous years.

#### 1. Trends in ISDS: new cases and outcomes

#### a. New cases initiated in 2021

In 2021, investors initiated 68 publicly known ISDS cases under IIAs (figure 1; annex 1). As of 1 January 2022, the total number of publicly known ISDS claims had reached 1,190. As some arbitrations can be kept confidential, the actual number of disputes filed in 2021 and in previous years is likely higher. To date, 130 countries and one economic grouping are known to have been respondents to one or more ISDS claims. In 2022, the war in Ukraine brought into the spotlight past and potential future ISDS claims relating to armed conflict (box 1).

#### Box 1. IIA-based ISDS cases related to war and armed conflict: facts and examples

ISDS cases can arise out of events related to war and armed conflict. In the past, at least 30 ISDS cases brought against States arose out of destruction or harm caused to investments in the context of war, armed conflict, military operations and civil unrest (annex 2). This includes the first known ISDS case based on an IIA brought in 1987: AAPL v. Sri Lanka, which arose out of the alleged destruction of the claimant's investment during a military operation conducted by Sri Lankan security forces.

International courts and tribunals (e.g. the International Court of Justice and the International Criminal Court) may weigh in on specific elements of armed conflicts. Disputes may also occur in the trade context and at the WTO through the State—State dispute mechanism.

The stock of IIAs in force commonly protects covered investments in cases of direct and indirect expropriation, impairment and losses owing to war or armed conflict. They also include other substantive protection standards such as full protection and security, and fair and equitable treatment. Most of these IIAs grant covered investors direct access to international arbitration in case of treaty violations. Some 15 per cent of them include exceptions that could help countries ward off ISDS claims related to emergency measures taken for the protection of essential security interests. Generally, ISDS tribunals have not pronounced on the legality of the use of force. Instead, they have limited their assessments to the question of State responsibility for breaches of IIAs. The underlying events giving rise to ISDS claims related to armed conflicts are multifaceted and multi-layered.

Out of the 30 ISDS cases identified in this context, the Russian Federation and Libya were the most frequent respondents, with 10 cases each. The cases against the Russian Federation related to the events in Crimea in 2014, including nationalizations in different economic sectors. Ukrainian companies and businesspeople invoked the Russian Federation—Ukraine bilateral investment treaty (BIT, 1998), alleging expropriation of assets by the Russian Federation (e.g. *Ukrenergo v. Russia; Oschadbank v. Russia; Naftogaz and others v. Russia*). The cases against Libya mostly related to the alleged failure to protect foreign investments during times of war and civil unrest in the country (e.g. *Trasta v. Libya; Cengiz v. Libya*).

In addition to the 30 identified ISDS cases, several cases were related to economic sanctions and the suspension of diplomatic relations (e.g. *Qatar Pharma and Al Sulaiti v. Saudi Arabia; belN v. Saudi Arabia*).

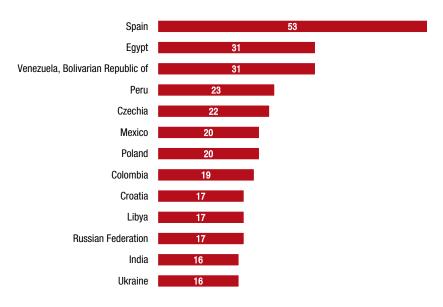

Source: UNCTAD.

*Note:* The ISDS cases related to war and armed conflict were identified on the basis of UNCTAD's ISDS Navigator and information from other public sources, including notices of arbitration, arbitral decisions and specialized reporting services.

#### (i) Respondent States

The new ISDS cases in 2021 were initiated against 42 countries. Peru was the most frequent respondent, with six known cases, followed by Egypt and Ukraine with four known cases each. Five countries — Cambodia, Congo, Finland, Malta and the Netherlands — faced their first known ISDS claims. As in previous years, the majority of new cases (about 65 per cent) were brought against developing countries. In the past 10 years, Spain, Egypt and Venezuela have received the largest share of claims (figure 2). Looking at the 1,190 known ISDS cases filed since 1987 (the year of the first treaty-based ISDS case), Argentina (with 62 cases), Spain (55 cases) and Venezuela (55 cases) have been the most frequent respondent States.

Figure 2. Most frequent respondent States, 2012–2021 (Number of known cases)

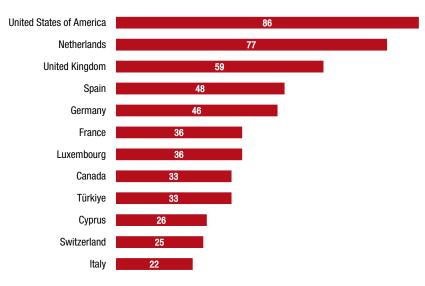

Source: UNCTAD, ISDS Navigator.

#### (ii) Claimant home States

Developed-country claimants brought most – about 75 per cent – of the 68 known cases in 2021. The highest numbers of cases were brought by claimants from the United States (10 cases), France (5 cases), the Netherlands (5 cases) and the United Kingdom (5 cases). In the past 10 years, investors from the United States, the Netherlands and the United Kingdom have filed the largest number of claims (figure 3). Overall, these three countries have been the three most frequent home States of claimants in known ISDS cases filed from 1987 to 2021.

Figure 3. Most frequent home States of claimants, 2012–2021 (Number of known cases)

Source: UNCTAD, ISDS Navigator.

#### (iii) Applicable investment treaties

About 75 per cent of investment arbitrations in 2021 were brought under BITs and TIPs signed in the 1990s or earlier. The ECT (1994) was the IIA invoked most frequently in 2021, with seven cases, followed by NAFTA (1992) in combination with the United States-Mexico-Canada Agreement (USMCA, 2018), with four cases.<sup>1</sup>

<sup>1</sup> Under Annex 14-C of the USMCA, the parties consent to the submission of so-called "legacy investment claims" under NAFTA until three years after its termination, i.e. 1 July 2023.

Overall (1987–2021), about 20 per cent of the 1,190 known ISDS cases have invoked the ECT (145 cases), NAFTA (76 cases) or the Investment Agreement of the Organisation of Islamic Cooperation (OIC; 16 cases).

#### b. ISDS outcomes

#### (i) Decisions and outcomes in 2021

In 2021, ISDS tribunals rendered at least 54 substantive decisions in investor—State disputes, 31 of which were in the public domain at the time of writing: 11 of the public decisions principally addressed jurisdictional issues (including preliminary objections), with 4 upholding the tribunal's jurisdiction and 7 declining jurisdiction. The remaining 20 public decisions were rendered on the merits, with 12 holding the State liable for IIA breaches and 8 dismissing all investor claims.

In addition, six publicly known decisions were rendered in annulment proceedings at the International Centre for Settlement of Investment Disputes (ICSID). ICSID ad hoc committees rejected the applications for annulment in five cases; in one case, the award at issue was partially annulled.

#### (ii) Overall outcomes

By the end of 2021, at least 807 ISDS proceedings had been concluded. The relative share of case outcomes changed only slightly from previous years (figure 4).

Thirty-eight per cent of all concluded cases were decided in favour of the State (claims were dismissed either on jurisdictional grounds or on the merits), and 28 per cent were decided in favour of the investor, with monetary compensation awarded. Nineteen per cent of the cases were settled; in most cases, the terms of settlement remained confidential. In the remaining proceedings, either the cases were discontinued or the tribunal found an IIA breach but did not award monetary compensation.

Looking at the totality of decisions on the merits (i.e. where a tribunal determined whether the challenged measure breached any of the IIA's substantive obligations), 56 per cent were decided in favour of the investor (breach found and damages awarded). The remainder were dismissed on the merits or breaches were found but no damages awarded (figure 5).

Figure 4. Results of concluded cases, 1987–2021 (Per cent)

<sup>a</sup> Decided in favour of neither party (liability found but no damages awarded).

*Note:* Excludes cases (i) dismissed by tribunals for lack of jurisdiction, (ii) settled, (iii) discontinued for reasons other than settlement (or for unknown reasons).

#### 2. Tax-related ISDS cases based on IIAs: facts and numbers

Investors have challenged tax-related measures in 165 ISDS cases based on IIAs (figure 6; annex 3). A wide working definition of the term "tax" was used to identify tax-related ISDS cases based on IIAs.<sup>2</sup> From 2000 to 2021, the absolute number of tax-related cases has grown at the same speed as overall ISDS cases (figure 7). Tax-related claims accounted for about 15 per cent of the 1,190 publicly known ISDS cases filed overall as of the end of 2021.<sup>3</sup>

Figure 6. Tax-related ISDS cases based on IIAs, 1987–2021 (Number of known cases)

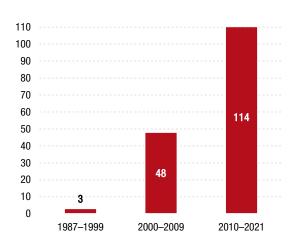

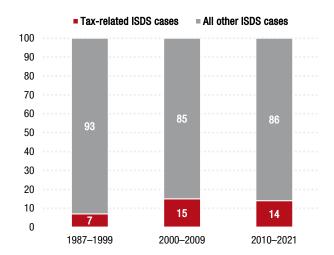

Figure 7. Share of tax-related ISDS cases out of the total 1,190 cases (Per cent)

Source: UNCTAD.

*Note:* Tax-related ISDS cases have been compiled based on UNCTAD's ISDS Navigator and information from public sources, including notices of arbitration, arbitral decisions and specialized reporting services.

Source: UNCTAD, ISDS Navigator.

Several tax-related ISDS cases and awards have attracted public attention. High-profile examples include cases challenging the following types of State conduct:

- Imposition of capital gains taxes (Cairn v. India, Vodafone v. India (I) and (II))
- Initiation of tax investigations and large tax assessments (Hulley Enterprises v. Russia, Veteran Petroleum v. Russia, Yukos Universal v. Russia)
- Increases in windfall profit taxes and royalties (Burlington v. Ecuador, ConocoPhillips v. Venezuela)
- Legislative reforms in the renewable energy sector related to feed-in tariffs and incentives for solar energy (The PV Investors v. Spain, Charanne and Construction Investments v. Spain)
- Withdrawal of subsidies or tax exemptions (Micula v. Romania (II))

Tax-related claims played a major role in many of the 165 ISDS cases. In other tax-related cases, tax measures were one element among the alleged breaches but did not feature as the major subject matter.

Overall, the types of tax-related ISDS claims that have arisen under IIAs were diverse (e.g. withdrawal of incentives, increases in windfall profit taxes) and often intertwined with non-tax measures (e.g. forced liquidation,

5

<sup>&</sup>lt;sup>2</sup> These 165 cases were identified on the basis of UNCTAD's ISDS Navigator and information from other public sources, including notices of arbitration, arbitral decisions and specialized reporting services. A wide working definition of the term "tax" was used, considering the controversy regarding the scope of the term in the context of ISDS practice. Whether or not a case involves "tax-related" matters can be subject to differing views between the claimant investor and the respondent State, especially if there is a tax exception under the relevant IIA. The analysis of this question rests with the arbitral tribunal deciding the specific case. In a number of tax-related cases, information on the challenged measures was limited or incomplete.

<sup>&</sup>lt;sup>3</sup> UNCTAD's statistics do not cover investor–State cases that are based exclusively on investment contracts (State contracts) or national investment laws, or cases in which a party has signaled its intention to submit a claim to ISDS but has not commenced the arbitration. Annual and cumulative case numbers are continually adjusted as a result of verification processes and may not match exactly case numbers reported in previous years.

interference with or termination of contracts). Tax-related ISDS cases can, but do not necessarily, overlap with the subject matter covered by double-taxation treaties (DTTs) and the mutual agreement procedure.

#### **Respondent States**

Sixty per cent of the tax-related cases were brought against developed countries; the remaining 40 per cent were directed at developing countries (figure 8). Spain was the most frequent respondent with 42 cases (about 25 per cent of all tax-related ISDS cases), followed by Ecuador and Italy with 10 cases each. Overall, 47 respondent States have faced at least one known tax-related ISDS claim.

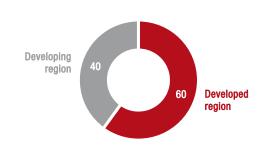

#### Claimant home States

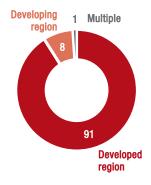

Developed-country investors brought over 90 per cent of tax-related IIA claims (figure 9). The highest numbers of such cases were initiated by claimants from the Netherlands (30 cases), the United States (26 cases) and Germany (24 cases).

About 40 per cent of all tax-related ISDS cases were so-called intra-EU disputes brought by EU claimants against EU respondent States (63 cases).

Figure 8. Respondent States in tax-related ISDS cases, by country category (Per cent)

Figure 9. Home States of claimants in tax-related ISDS cases, by country category (Per cent)

Source: UNCTAD, ISDS Navigator.

Source: UNCTAD, ISDS Navigator.

#### IIAs invoked

The ECT (1994) was the IIA invoked most frequently in tax-related ISDS cases, with 68 cases, followed by NAFTA (1992) with 12 cases and the Ecuador–United States BIT (1993) with 6 cases.

Most of the tax-related cases under the ECT were intra-EU disputes related to investments in the renewable energy sector (57 cases).

#### **Economic sectors involved**

About 60 per cent of the tax-related ISDS cases related to activities in the services sector:

- Supply of electricity, gas, steam and air (75 cases)
- Information and communication, e.g. telecommunications (11 cases)
- Wholesale and retail trade (7 cases)
- Construction, e.g. construction of buildings and civil engineering (4 cases)
- Arts, entertainment and recreation, e.g. gambling and betting activities (3 cases)
- Transportation and storage (3 cases)
- Financial and insurance activities (3 cases)

Primary industries (mostly consisting of mining and quarrying activities) accounted for about 25 per cent of the new cases and manufacturing for about 15 per cent.

A guide released in 2021 and the World Investment Report 2022 (Chapters 2 and 3) consider the implications of IIAs for tax policymaking. They also present IIA reform options to minimize the risk of friction with tax measures.

### Annex 1. List of known IIA-based ISDS cases initiated in 2021

No.	Short case name ©	Respondent State	Home State of claimant	Applicable IIA

Source: UNCTAD, ISDS Navigator.

This IIA Issues Note was prepared by UNCTAD's IIA team, under the supervision of Joerg Weber and the overall guidance of James Zhan. The IIA team is managed by Hamed El-Kady.

The note is based on research conducted by Diana Rosert. Josef Ostřanský and Magdalena Bulit Goñi provided contributions to box 1 and annex 2. We wish to thank Sebastian Wuschka for feedback on the draft version of box 1.

The compilation of tax-related ISDS cases based on IIAs (section 2 and annex 3) benefited from background research in collaboration with the team at the WU Global Tax Policy Centre led by Jeffrey Owens, including Siddhesh Rao, Angelina Papulova, Joy W. Ndubai, Sudarshan Rangan, Iva Uljanić Skreblin, Svitlana Buriak, Martha Caziero and Maria Tambunan.
